

CASA VIEJO HOME OF ELEGANCE AND SIMPLICITY

With skill and perception both builder and architect produce a style that is bold and subtle... contradictory in its components... yet harmonious in its effect. The massive entry door pivots, introducing you to a wonderful feeling of space. The living room and den are imaginatively designed with the feeling of a great hall, separated by a fireplace and overlooked by the dining room. The breakfast room is elegance in the round. The ten-foot expanse of window surveys the front courtyard. Recessed niches provide china storage and artifacts display. Wood beams and decking enhance the entry, living room, breakfast room and master bedroom. Two bedrooms, den, two baths: 2330 square feet.
